

The Marianjoy Subacute Center

A Transitional Care Unit Within Marianjoy Rehabilitation Hospital

MARIANJOY
Rehabilitation Hospital
Wheaton Franciscan Healthcare

Marianjoy: Full Spectrum of Care

As a trusted partner during the rehabilitation process, Marianjoy delivers the intensity of services each patient needs— from general rehabilitation to the most complex level of care.

Acute Inpatient Rehabilitation

Marianjoy provides acute inpatient care to individuals requiring intensive rehabilitation and 24-hour hospital support. Our peaceful inpatient environment combines the medical expertise of our caring and compassionate staff with state-of-the-art technology to meet the therapeutic needs of each patient.

Subacute Inpatient Rehabilitation

Marianjoy provides subacute inpatient care to individuals who are unable to withstand or do not require inpatient acute rehabilitation.

In addition, Marianjoy has partnerships with some of the area's leading subacute skilled nursing facilities. Within the scope of subacute care, physicians, nurses, and therapists are available to meet both the medical and rehabilitation needs of all patients.

Outpatient Rehabilitation, Physical Therapy, and Physician Clinics

Marianjoy outpatient adult and pediatric rehabilitation includes physical, occupational, and speech therapy, pain management, driver rehabilitation and physician clinics. The scope and intensity of Marianjoy's outpatient services are designed to improve the patient's level of functioning based on the individual's needs and the referring physician's recommendations.

The Marianjoy Subacute Center

For over 35 years, Marianjoy has been known for providing exceptional and compassionate acute rehabilitation care in the hospital setting. Now Marianjoy can offer the same high quality rehabilitation in a subacute setting – conveniently located on the 60 acre Wheaton campus.

Subacute care meets the need of those patients who are unable to withstand the intensity of acute rehabilitation therapy. It is also ideal for those patients who have completed our acute rehabilitation program, but still need to work toward their functional goals in order to return home. Responding to these patients needs, Marianjoy has established a new level of care that provides an integrated "link" between acute rehabilitation and home.

The Marianjoy Subacute Center is a specialized 27-bed transitional care unit located within Marianjoy Rehabilitation Hospital. The Marianjoy Subacute Center provides comprehensive subacute rehabilitation for patients who require an inpatient stay with a customized therapy plan designed to move them to a higher level of independence. This multi-disciplinary approach helps individuals return to many of the activities of daily life they have previously enjoyed.

The Marianjoy Subacute Center is part of a comprehensive continuum of care offered by Marianjoy which also includes acute inpatient rehabilitation, outpatient physical therapy, and physician specialty clinics.

Marianjoy has been a pioneer in the subacute level of care for more than 20 years, working with and establishing partnerships with some of the area's leading skilled nursing facilities. As a leader in this level of care, the Marianjoy Subacute Center is available to provide:

- A patient and family-centered care team including nurses, therapists, case manager and physician working together toward the patient's functional goals
- Focused and efficient rehabilitation services that may include physical therapy, occupational therapy and speech therapy
- 24-hour nursing supervision
- Medical management led by a Marianjoy Medical Group board-certified physician specializing in physical medicine and rehabilitation
- Meetings with the patient, family and the care team to discuss the patient's condition and progress
- Education for the patient and their family to successfully prepare to transition home or to another level of care
- Specialized care for orthopedic patients

Staffed by a Team of Clinical Experts

The Marianjoy Subacute Center is staffed by a team of clinical experts including therapists and nurses who work under the direction of a Marianjoy Medical Group physician. Together with input from the patient and family, the team determines the most effective and efficient treatment plan to help maximize the patient's independence. This plan is monitored and adjusted as needed throughout their stay.

The Marianjoy Subacute Center rehabilitation team includes:

Board-Certified Psychiatrists: Medical management is provided by an on-site Marianjoy Medical Group psychiatrist, a physician who is involved in assessing and monitoring the patient's ongoing care and addresses the modification of each patient's changing needs with the team.

Nursing Care: Registered nurses provide daily nursing care as well as 24-hour nursing supervision.

Therapy Team: Physical, occupational, and speech-language therapists collaborate to develop a comprehensive individualized treatment plan to meet the needs and goals of each patient.

Case Managers: A case manager is available to coordinate care and discharge planning for the patient.

Ongoing Relationship With Referring Physicians: Marianjoy works closely with referring physicians, including orthopedic and neurological specialists, to keep them informed of their patient's progress. Discharge plan and progress reports are shared with the patient's referring or primary care physician, to whom the patients are returned when they leave Marianjoy.

The Marianjoy Subacute Center accepts Medicare and most commercial insurance payments for patients that meet the admission criteria.

Compassionate Care in a Holistic Setting

The Marianjoy Subacute Center is located in Marianjoy Rehabilitation Hospital – an award-winning facility. Located on a 60-acre campus rich with ancient oaks, native prairie growth, and wildlife, the facility features an abundance of windows designed to create a warm and welcoming interior.

Private Rooms

Large private rooms provide patients and their families a tranquil, safe environment with floor-to-ceiling windows to view the campus environment. Other features designed for the comfort of patients and visitors include:

- Cable television and educational videos
- Wheelchair accessible private bathrooms
- A sofa that converts into a sleeper for the comfort of family members
- A safe to secure personal items
- Telephone with free local phone calls
- Free convenient garage parking

Welcoming Lobby

The two-story main lobby is enhanced by a 15-foot water wall and stone fireplace, creating an inviting entrance that sets the tone for healing and serenity throughout the entire facility.

Enabling Garden

A central courtyard enabling garden gives patients the opportunity to enjoy the outdoors within the serenity of the hospital. Complete with soothing music and water features for sensory stimulation, patients can experience the healing effects of interacting with nature. Marianjoy patients can participate in horticultural therapy and practice navigating the various types of outdoor surfaces they will encounter once they return home.

Authentic Labyrinth

The centrally located labyrinth garden offers patients, families, and visitors the opportunity to use the labyrinth for meditation, therapy, and spiritual reflection. Built by renowned labyrinth expert Robert Ferré, it is an exact replica of the Chartres Cathedral labyrinth in France.

Two-Story Chapel

A two-story chapel incorporates handcrafted stained glass windows, inviting natural light to illuminate the room and provide a peaceful view of the wooded grounds.

Meditation Room

Available to both patients and visitors, a soundproof, softly lit meditation room promotes relaxation and centering. The room features a projected meditation mandala designed by expert Judith Cornell, Ph.D.

Ambient Music

To facilitate healing and promote stress reduction, music that has been customized for the hospital by music expert and author Don Campbell can be experienced in key areas of the facility.

Therapeutic Garden

Augmenting the expanded outpatient pavilion, a therapeutic garden incorporates walkways of various surfaces for patients and their therapists to practice real world challenges.

Caring With Spirit Since 1972

Marianjoy has been Caring with Spirit since 1972, providing rehabilitation services to patients of all ages. Our vast experience and patient-centered environment has helped thousands of people restore parts of their lives changed by illness, injury, or disease and return to their homes and communities.

The Marianjoy Foundation is a 501(c)(3) not-for-profit organization and serves as the fundraising and gift processing arm of Marianjoy Rehabilitation Hospital. Contributions to the Marianjoy Foundation are tax-deductible and help fund patient care, education, research, and community outreach programs. Foundation staff members work to achieve the unique philanthropic goals of individual donors, families, businesses, foundations and other organizations. Donations enable us to build and maintain the strong financial base needed to advance the mission of Marianjoy and Wheaton Franciscan Healthcare. For more information, or to make a donation, please call 630-909-7390.

Marianjoy is a member of Wheaton Franciscan Healthcare. Sponsored by the Wheaton Franciscan Sisters, Wheaton Franciscan Healthcare owns and operates more than 100 not-for-profit health and shelter service organizations in Colorado, Illinois, Iowa and Wisconsin.
