Summer Therapeutic Golf Program

Marianjoy Rehabilitation Hospital, part of Northwestern Medicine, is dedicated to helping individuals with disabilities return to recreational activities they enjoy. Marianjoy's Therapeutic Golf Program was developed to help participants learn or return to the game of golf.

Golf is a great leisure activity that also helps develop or maintain flexibility and range of motion; improve attention and concentration; increase upper body strength and endurance; and improve balance and eye-hand coordination.

Our summer adult golf clinics are led by Marianjoy therapists and golf professionals who offer individualized attention and instruction, such as modifications to swing and stance, or the introduction of adaptive equipment.

Program information

Cost

The cost for each clinic is \$25. Registration and a physician release are required.
